Varsha Sathiskumar

varsha_sathiskumar@mines.edu | linkedin.com/in/varsha-sathiskumar | github.com/VarshaSathiskumar

Professional Summary

Full Stack Engineer with 4+ years of experience building scalable enterprise B2B and SaaS web applications. Proficient in Java, Spring Boot, Node.js, Python, C#/.NET, and Kubernetes, with experience delivering solutions from development to production.

Education

Colorado School of Mines | Golden, CO
Master of Science in Computer Science - GPA: 3.6/4.0 Dec 2026

Thiagarajar College of Engineering | Madurai, India
Bachelor of Technology in Information Technology - GPA: 8.7/10.0 Apr 2021

Work Experience

Software Engineer Intern - AI | NociQuant Inc, Minneapolis, MN Jun 2026 – Aug 2026

- Engineered an AI diagnostic pipeline for chronic pain, improving diagnostic accuracy from **68% to 85%** and retrieval recall by **48%** through **multi-query RAG** over 1,700+ medical research papers, **6 reasoning agents** and Bayesian probability-based disease ranking across 10K clinical cases, using **LangChain, LangGraph, and Python**.

Full Stack Software Engineer | Kimberly-Clark, India May 2023 – Mar 2025

- Owned **full-stack development** of an enterprise CPQ platform supporting a **$2.15B annual revenue** business, delivering 50+ features across 4 global regions, achieving **97% UAT** using **C#, .NET,** and **ASP.NET MVC**.
- Led the implementation of **12+ Node.js REST APIs** replacing legacy .NET endpoints and supporting 180K+ annual web and Salesforce transactions with **Okta OAuth 2.0/OIDC** authentication, **Redis caching**, and rate limiting.
- Developed a reports module with **interactive search, filtering, and exports**, eliminating timeouts by reducing **10K-record** export times from **3+ minutes to under 800 ms** through set-based **T-SQL** processing and composite indexes.
- Cut **redundant reapprovals by 50%** in multi-level quote approval workflows for sales team, supporting **4K+ weekly agreements** through change-aware routing, automated approver reassignment, and email notification using **C#/.NET** and **SQL Server**.

Associate Software Engineer | Kimberly-Clark, India Sep 2021 – Apr 2023

- Owned 7+ **Java and Spring Boot microservices** managing 8,000+ IoT devices with **99.99% uptime**, powering real-time monitoring dashboards through secure **REST APIs** and **Cosmos DB (NoSQL)**, deployed using **Docker** and **Kubernetes**.
- Built an **event-driven IoT alerting pipeline** processing **1M+ daily events**, contributing to $68K+ in annual savings per facility using **Apache Kafka** for telemetry ingestion, Azure Functions for threshold evaluation, and **RabbitMQ** for alert delivery.
- Delivered **20+ React UI modules** from **Figma designs** with product designers for a new Onvation release, building **real-time dashboards** to track IoT device usage, consumable levels, and status, contributing to **$1M+ in new revenue**.
- Expanded automated **test coverage** from **1,200 to 1,800+** test cases across 100+ workflows, catching defects and regressions before release using **JUnit, Mockito, and Playwright**.

Software Engineer Intern | Kimberly-Clark, India Jan 2021 – Aug 2021

- Redesigned a centralized consulting request platform serving **3,000+ global team members** and processing 75+ weekly requests, **reducing processing time from over 1 day to under 4 hours** using **React, HTML, CSS, TypeScript**.

Projects

Real-Time Analytics Monitoring Platform | GitHub | Live Demo | Oct 2026

- Built a real-time GitHub analytics platform, implementing event-driven ingestion, deduplication, windowed aggregations, and **gRPC**-based inter-service health checks with **React, Java/Spring Boot, Apache Kafka, and Kafka Streams**.
- Processed **768 events/sec with 26 ms p50 latency** using **Redis** for real-time counters, **PostgreSQL** for persistent analytics, and **WebSockets** for live updates, implementing fault-tolerant processing with retries, idempotent writes, and dead-letter queues.

Technical Skills

Languages: Python, Java, C#, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Architecture: React, Node.js, Spring Boot, FastAPI, REST APIs, Microservices, Apache Kafka, Kafka Streams, Swagger/OpenAPI, JUnit, Mockito, Jest, pytest, Playwright
Cloud & Infrastructure: PostgreSQL, Microsoft SQL Server, Azure SQL, Cosmos DB (NoSQL), Redis, Microsoft Azure, Docker, Azure Kubernetes Service, Splunk
AI/ML: LangChain, LangGraph, MCP, RAG, Multi-Agent Orchestration, LLM Evaluation, OpenAI API, ChromaDB, Claude Code
